

TOP SECRET

8 March 1965

MEMORANDUM FOR: Director of Security

SUBJECT: Security Aspects of Item in USEUCOM Document

REFERENCES:

a.  
b.

1. In response to reference a and as the only interim measure that seemed possible at this time, the Chairman, COMOR referred reference b to COMOR and requested  the DIA member, to see what could be done to eliminate or reduce the type of violation you forwarded to us with reference b. His action is shown in the attached cable.

2. It was pointed out to  that this would be a holding operation pending DIA submitting to USIB its recommendations on the subject of lifting of restraints on T-KH materials. COMOR action on that subject has been held up due to DIA's inability to obtain guidance from General Carroll. This action, as explained in reference b, would represent a first step toward freeing the log jam which now precludes final action on those security measures recommended by you to the Board on 22 September 1964.

3. In our estimation the DIA cable goes as far as it can go at this time and under the circumstances. However, we do not feel that there can be a thorough understanding of security implications and effective responsibility and control down the line until the Sanitization Manual and its annexes have been revised. We appreciate of course that if it is USIB's decision to relax controls on KH along the lines that have been suggested, the IBSEC recommendations of 22 September will require drastic revision.

TOP SECRET

4. Unless you feel otherwise, COMOR intends no further action on this matter until the question of lifting the restraints on T-KH material is decided by the Board.
